

2009-2010 annual report

FROM THE PRESIDENT:

Everyone: Thank you so much for taking a look at the annual report from Southern Crescent Technical College. You read in the annual report last year that on the first of July, 2010, Griffin Technical College and Flint River Technical College would merge to form a new institution – Southern Crescent Technical College. That merger did in fact take place, and today, the staff and faculty of Southern Crescent are proud of our new institution, and the pathway we are on. As you read this report, the new institution is host to over 6,500 credit and 3,000 adult education students, as well as a number of students in various businesses and in the high schools within the newly combined service area.

As the newly named president of Southern Crescent Technical College, I am quite pleased to say that the new institution is humming along — just as we all knew it would. I mean, why wouldn't it? The people who work here today are the same folks who did such an incredible job at the two precursor colleges, and they are still at the top of their game. I am still meeting new folks every day, and I have been terribly impressed with the skills, talents, and hyper-drive motivation of everyone I have met. If you haven't been on one of our campuses for a while, come on out—you're in for a treat!

As you take time to review the annual report, I hope you will recall all the great things the previous colleges did for their respective communities, and that you will understand our new, combined institution will deliver nothing less. We are still your local technical college. Speaking for the combined staff and faculty, I want you to know you have our promise that we will never compromise on quality, or integrity, and that if you are hiring new employees, you can depend absolutely on the person who brings with him or her a credential from Southern Crescent Technical College. And if you are one of those who have earned a credential, know that we will stand behind you, just as our predecessors did.

I look forward to seeing you on campus.

Randall L. Peters, Ed.D. *President*

2009-2010 ANNUAL REPORT

proud of our new institution, and the pathway we are on

Southern Crescent Technical College:

- has two campus locations and three centers which serve the workforce and community needs of over 500,000 citizens residing in Butts, Fayette, Henry, Jasper, Lamar, Pike, Spalding, Talbot, Taylor, and Upson counties
- has various building projects underway including a 35,000 square foot building on the Flint River Campus scheduled to open Spring 2011, an 80,000 square foot allied health building on the Griffin Campus with plans to go out for bid Spring 2011, and a new 35,000 square foot building in the preliminary design phase for the new Henry County Center
- kicked off the Fall 2010 inaugural season for TIGER Athletics
- experienced a 32% growth in offerings and a 35% increase in students enrolled in Distance Education courses
- currently offers over 100 programs of study and is continually expanding these offerings to meet the needs of local business and industry
- offers Adult Education and GED preparation classes in 24 community locations throughout the service area
- continues to increase Continuing Education offerings
- awarded \$26,943 in scholarships to deserving students for tuition, books, and supplies through the Foundations
- successfully merged programs, policies, procedures, and personnel to form one of the largest technical colleges in Georgia

MISSION STATEMENT Southern Crescent Technical College, a unit of the Technical College System of Georgia, provides technical degrees, diplomas and certificates, as well as programs in adult education, continuing education and workforce training that are high quality, community centered and student focused. The College provides learning opportunities that promote economic development in the southern crescent region of central Georgia.

VISION STATEMENT Southern Crescent Technical College is a teaching and learning institution that envisions itself as an exceptional, innovative, and unparalleled technical college that places students at the forefront of educational excellence. The College's programs of study enable students to develop skills, knowledge, attitudes, and work ethics essential for securing and maintaining employment. In addition, the programs will enable students to function as responsible citizens in the community. The College will provide special support services that identify and remove potential barriers for individuals demonstrating a genuine desire to pursue their educational and career goals. The College firmly believes that students who successfully complete a program of study will have a greater opportunity of employment, a better understanding of their role in society, and a better quality of life in their community.

Southern Crescent Technical College is dedicated to developing and maintaining an active partnership with local businesses, industries, and governmental and public service agencies. This shall be accomplished by active participation of employees in the exchanging of ideas and information with community organizations. It is the College's belief that this active partnership will assure a greater quality and validity of its programs and services. In addition, the partnership will contribute to an environment which maximizes the effectiveness of each party's effort toward community economic growth and development.

WORK ETHICS The number one priority of Georgia's employers is to improve the work ethics of present and future employees. For that reason, Southern Crescent Technical College emphasizes the development of good work habits by teaching ten work ethics traits. In addition to an academic grade, each student is assigned a work ethics grade in each class based on the following subjects: attendance, character, teamwork, appearance, attitude, productivity, organization, communication, cooperation, and respect.

GUARANTEE The Technical College System of Georgia and Southern Crescent Technical College are proud to offer the following guarantee effective for two years after graduation: If one of our graduates educated under a standard program or his/her employer finds that the graduate is deficient in one or more competencies as defined in the standards, the technical college will retrain the employee at no instructional cost to the employee or the employer. In an increasingly competitive global marketplace, one of the most important challenges facing Georgia today is the education and training of a technologically-advanced, highly-skilled workforce — the lifeblood for continued growth and development.
